ITU TELECOM WORLD 2014 Young Innovators Competition

CHALLENGE 2

OPEN SOURCE TECHNOLOGIES

DISASTER MANAGEMENT

ITU, the leading United Nations agency for information and communication technology seeks **the most promising tech start-ups** making use of **open source technologies for disaster management**. This could include disaster preparedness, early warning, emergency communication and response, and recovery from natural disasters.

We are looking for communication technologies, teaching tools, new equipment to save lives during a disaster, and new tools to help clean up, recover and rebuild after the event. Examples of open source technologies used in disaster management may include 3D printing, UAVs, Raspberry Pi and Arduino – we invite you surprise us with your innovative approach

Are you an entrepreneur under the age of 30 and interested **in winning up to USD 10,000** in funding plus mentorship, networking, and high-level exposure?

Do you want to be part of the select group of 10 young innovators from all over the world presented **at ITU Telecom World 2014** in Doha, Qatar?

Apply now at: https://ideas.itu.int

Deadline: Thursday, July 31 2014
