Subject: invitation to collaboration

Dear Ana Ružička!

I'm a vice-dean of the Faculty of Electronics and Instrument Making of Saratov State Technical University (Russia). On behalf of the dean the Faculty Prof. A. Bolshakov I will be appreciated if you pay attention to our proposal.

Saratov State Technical University (SSTU) is one of the biggest educational and scientific centers of the Volga region and throughout our country, see www.sstu-edu.ru. Our Faculty provides education in the following fields: Automation and Control Engineering, Radio Engineering, Electronics and Microelectronics, Electron Devices, Robotics, Control and Management of Technical Systems, Software Engineering, Information Systems and Technologies, Instrument- Making, Biomechanical and Medical Devices and Systems.

I think it would be a good idea if we could cooperate in a spirit of greater understanding, to deepen friendly relationships and ties of mutual benefit.

We could undertake different joint academic activities, such as:

- organization and performance of the joint research projects, academic seminars and guest lectures;
- exchange of staff and students;
- exchange of scholarly materials, research reports, publications;
- performance of additional activities which might be separately agreed.

We would like to invite you and your colleagues cordially to visit Saratov State Technical University and our Faculty in the immediate future, as well as we also would like to visit your institute to familiarize with colleagues and established our cooperation.

As a conference coordinator I would like to invite your colleagues to take part in the international conference "ACTUAL PROBLEMS OF ELECTRON DEVICES ENGINEERING" that will be held at Saratov State University on September, 24-25, 2008. For details see www.apede2008.sstu.ru.

If you require further information, we shall be happy to let you have this, on request. We would delight if you accept this invitation.

I look forward to hear from you soon.

Yours faithfully,

Vice-dean of the Faculty of Electronics and Instrument Making

A. Miroshnichenko
