

# AUTHOR INDEX

- Adams, Douglas:  
    the answer being 42 in 'The Hitchhiker's  
        Guide to the Galaxy', 152
- Alcatel:  
    SQC for product development purposes,  
        225
- Aldridge Jr., E. C.:  
    Under Secretary of Defense, 295
- Ansoff, H. Igor:  
    design process, 203  
    gap analysis, 210
- Anthony, R. N.:  
    abandoned procedures, 391
- AT&T:  
    PDSA cycle, 294
- Bailey, Carolyn:  
    attributing quote to Deming, 324
- Basili, V., 293  
    Evolutionary Project Management, 358
- Bellcore, 223
- Bernstein:  
    on risk, 409
- Blackmore, Susan:  
    design and evolution, 351
- Blanchard (DoD)  
    definition of Systems Engineering, 428
- Boehm, Barry W.:  
    major influence, xii
- Boeing:  
    finding defects, 258  
    hardware use of SQC, 225
- Boeing (Douglas Aircraft)  
    effect of SQC, 223
- Boeing, Renton:  
    effect of SQC, 223
- British Aerospace, Eurofighter Project,  
    Wharton:  
        defect reduction, 224
- Brodie, Lindsey:  
    acknowledgement, xv
- Bull HN:  
    SQC checking efficiency/effectiveness,  
        232
- Calaprice, Alice:  
    editor of 'The Expanded Quotable  
        Einstein', 4
- Capablanca:  
    'next move' principle, 310
- Carrol, Lewis:  
    Alice and Humpty Dumpty text, 323  
    Alice and the Cheshire Cat text, 79
- Churchill, Winston:  
    vision statement, 52
- Cotton, Todd:  
    Evo within HP, 294
- Crosby, Philip B.:  
    continuous process improvement, 29  
    defect prevention, xviii  
    major influence, xii
- Daimler Chrysler:  
    idea of Due, 352  
    synonyms for Status, 423
- Dalziel, Thomas:  
    wood-engraving of Alice, 79, 323
- Danish Technical Institute, Lyngby:  
    SQC checking efficiency/effectiveness,  
        232
- Deming, W. Edwards:  
    as origin of DPP, 259  
    continuous process  
        improvement, 28  
    definition of Aim, 324  
    major influence, xii  
    operational definitions, 376  
    PDSA cycle, xviii, 5, 25, 294, 387  
    PDSA cycle: letter to  
        Tom Gilb, 388  
    process improvements, 229  
    "Survival is not compulsory", 318
- Dion:  
    productivity increases, 227
- Douglas Aircraft (now Boeing)  
    effect of SQC, 223  
    finding defects, 258  
    hardware use of SQC, 225  
    use of Evo, 294

## 462 Author Index

- Einstein, Albert:  
    “means and ends” quote, 4
- Ericsson:  
    Japanese Base Station, 41  
    SQC for product development purposes, 225
- Fagan, Michael E.:  
    design and code inspections, 224  
    inspection method, 371  
    SQC failures to fix rate, 248
- Federal Aviation Authority (FAA)  
    definition of Systems Engineering, 428
- Fossnes, Terje:  
    idea for Catastrophe, 336
- Fuenfhausen, Pete:  
    idea for Stretch, 424
- General Electric:  
    Jack Welch, 310
- Gilb, Kai:  
    acknowledgement, xv  
    idea for Trend, 286, 367, 433
- Grady:  
    HP results from SQC, 237
- Graham, Dorothy:  
    idea for Wish, 438
- Haskins, Cecilia:  
    idea for Catastrophe, 336
- Hayes, R. H. *et al.*:  
    on quantification, 413
- Heisenberg, Werner:  
    limited range of applicability, 321
- Hewlett Packard  
    10X policy, 52  
    Evolutionary Project  
        Management, 294  
    need for an SQC champion, 252  
    savings from process improvement, 29  
    SQC for hardware product planning, 225  
    vision statement, 52
- Howard Hughes:  
    Spruce Goose, 350
- HP *see* Hewlett Packard  
    results from SQC, 237
- IBM Federal Systems Division:  
    Evolutionary Project Management, 293
- IBM Rochester Labs, MN:  
    stable SQC effectiveness, 247
- IBM UK:  
    SQC effectiveness 95%, 247
- IBM, xviii  
    design and code inspections, 224  
    SQC effectiveness 60–90%, 247
- Intel, xviii  
    Foreword by Erik Simmons, vii  
    source of landing zone, 373  
    teaching example for setting scalar levels, 130
- Jet Propulsion Labs:  
    Evolutionary Project Management, 358  
    SQC checking efficiency/effectiveness, 232
- Jevons:  
    major influence, xii
- Juran, Joseph M.:  
    as origin of DPP, 261  
    continuous process improvement, 28  
    inspection method, 372  
    major influence, xii  
    PDSA cycle, xviii, 25, 296
- Keeney, Ralph L.:  
    major influence, xii
- Kelly, John:  
    SQC checking efficiency/effectiveness, 232
- Kelvin, Lord:  
    major influence, xii  
    on quantification, 164
- Kennedy, John F.:  
    vision statement, 52
- Keynes, J. M.:  
    distinguishing uncertainty, 434
- King Jr., Martin Luther:  
    ‘I have a dream’, 437
- Knight, Frank:  
    distinguishing risk, 409  
    distinguishing uncertainty, 434
- Koen, William:  
    major influence, xii  
    on engineering, 319
- Larman, Craig:  
    Evolutionary Project Management, 358
- Lockheed Martin *see* IBM Federal Systems Division
- Loral *see* IBM Federal Systems Division
- Maier, Mark W.:  
    Foreword, vii
- Malotau, Niels:  
    from ‘archi-tecton’, 425

- May, Elaine:
  - Evo within HP, 294
- MEI/Thorn EMI:
  - cost savings of using SQC, 251
- Mills, Don:
  - acknowledgement, xv
  - definition of Assumption, 328
- Mills, Harlan:
  - Evolutionary Project Management, 293, 358
  - process control, 26
- Morris, Peter W. G.:
  - requirements, 37
  - the need for evolutionary methods, 318
- Muller, Gerrit:
  - Stakeholder (diagram), 420
- Nielsen, Søren:
  - SQC checking efficiency/effectiveness, 232
- Nokia:
  - idea for Stretch, 424
- Norwegian Church Aid:
  - case study, 131
- Peters, Tom:
  - major influence, xii
  - technology trends, 3
- Philips:
  - Stakeholder (diagram), 420
- Plutarch:
  - "to err", 354
- Pressman, Roger:
  - Foreword, vii
- Ramo, Simon:
  - on quantification, 143
- Raytheon:
  - defect reduction, 224
  - ROI for SQC, 251
- Reeve, Trevor:
  - cost savings of using SQC, 250
  - defect sampling, 224
- Russell, Bertrand:
  - if experts disagree, 321
- Scottish Widows:
  - idea for Wish, 438
- Sema UK:
  - SQC effectiveness 95%, 247
- Shakespeare:
  - "What's in a name?", 321
- Shewhart, Walter:
  - inspection method, 371
  - PDSA cycle, 25, 294, 319, 387
  - PDSA cycle: usage of Check, 388
- Siemens:
  - SQC for product development purposes, 225
- Simmons, Erik:
  - acknowledgement, xv
  - Foreword, vii
  - implicit assumptions about scalar levels, 130
  - use of Landing Zone, 373
- Simon:
  - design process, 203
- Smith, Adam:
  - real price of everything, 183
- Synopsys, CA USA:
  - use of Rationale, 399
- Systect, Inc., 425
- Tao Teh Ching:
  - principles of, 311
- Tenniel, John:
  - Alice and Humpty Dumpty illustration, 323
  - Alice and the Cheshire Cat illustration, 79
- Thorn EMI:
  - defect sampling, 224
  - finding defects, 258
- Tzu, Lao, 311
- United Defense, Minnesota:
  - use of Kin concept, 373
- US Department of Defense (DoD)
  - Incremental Development, 370
  - MIL-STD-498, 293
- Von Clausewitz:
  - 'On War', 310
- Von Moltke:
  - on survival of a plan of operation, 310
- Weber, Jens:
  - idea of Due, 352
- Weinberg, Gerald M.:
  - major influence, xii
- Welch, Jack:
  - CEO General Electric, 310
  - measures and rewards, 413
  - on Stretch, 424
  - on Trend, 433

## **464** Author Index

Weller, Edward:  
    SQC checking efficiency/  
        effectiveness, 232

Wilde, Oscar:  
    on Value, 436

Woodward, Stuart:  
    acknowledgement, xv

Young, John:  
    vision statement, 52

Young, Ralph:  
    requirements, 37

Zimmer, Barbara:  
    Evo within HP, 294
